SMART WATER MAGAZINE MONTHLY IS BORN

After more than one year informing about the intense activity of the water sector across the world and the consolidation of Smart Water Magazine as the digital medium of choice for professionals, the time has come to take a step further, with the launch of Smart Water Magazine Monthly.

Smart Water Magazine Monthly is born with the aim of providing a detailed analysis of the most relevant topics through its key players. Using interviews, articles, opinion pieces and our own sections, Smart Water Magazine Monthly will inform you about the latest trends in water management voiced by decision makers.

SWM Monthly will be distributed through SmartWaterMagazine.com,

Smart Water Magazine Newsletter and the various Smart Water Magazine profiles in social media, ensuring a huge impact on its significant online community of water sector professionals.

The first Smart Water Magazine Monthly issue was launched in May 2020 with a great impact on the community of water professionals. More than 3,000 people have already read the magazine, and its content has garnered high praise on all social media.

Smart Water Magazine Monthly will be structured into six sections: Water Treatment, Digital, Utilities, SDGs, Climate Change and Business. Being released on a monthly basis will ensure its contents reflect the most current news landscape.
